

## A WORLDWIDE SUPPLIER OF RARE EARTH, NON-FERROUS, ADVANCED CERAMIC MATERIALS

### Refractory Materials

---

Tantalum	Hafnium
Niobium	Beryllium
Molybdenum	Precious Metals
Tungsten	Metal Foams and Fibers
Titanium	
Zirconium	
Rhenium	

### Advanced Ceramic Materials

---

Boron Nitride  
Alumina  
Aluminum Nitride  
Silicon Nitride  
Silicon Carbide  
Boron Carbide  
Zirconia

### Rare Earth Materials

---

### Deposition Materials

---

## OVER 20 YEARS OF EXPERIENCE IN PROVIDING TOP QUALITY ADVANCED MATERIALS, CHEMICALS, AND VARIOUS PRODUCTS.

We work with high tech companies and research laboratories around the world, and our customers include Apple, GE, U.S. Department of Defense, Google, and nearly every U.S. national laboratory.

### WE REGULARLY WORK IN:

Chemical & Pharmacy  
Furnace Components  
Radiation Shielding  
Counterweight  
Metallurgy  
Semiconductor  
Ion Implantation Components  
3D Printing Powder  
Thermal Spraying Coatings

### VARIOUS SHAPES SUCH AS:

Pellets  
Wires  
Foil  
Sheets  
Rods  
Tubings  
Sputter Targets  
Crucibles  
Powders  
Foams

Metals

Ceramics

Composites

Optics

Crystal Substrates

Labs

### Feedback from Our Customers

"Thank you for fixing our tantalum marker bands for us! Our previous supplier couldn't make these marker bands straight even though we worked with them for many months to solve the problem. Stanford Advanced Materials knew exactly how to solve our problem. The parts have been straight and flat with every shipment and we have now placed a blanket order."

Major Midwest US manufacturer of  
capital equipment

"Stanford Advanced Materials shipped top-quality boron nitride crucibles to my grad student in time for us to complete our project and write our report in time for a major conference. We were very glad they were delivered so quickly."

Professor/Student Adviser from  
major European technical university

## SUPPLYING HIGH-QUALITY MATERIALS FOR VARIOUS CUSTOMERS AROUND THE GLOBE

Stanford Advanced Materials supplies high-quality and consistent products to meet our customers' R&D and production needs. Some of our products include:

Precious Metals & Crucibles

Boron Nitride Ceramics

Shape Memory Alloys

Exotic Metals

Inconel Alloys

Incoloy Alloys

Rare Earth Metals and Alloys

Rare Earth Oxides and Compounds

Zirconia Grinding Media

Evaporation Materials

Sputtering Targets

Micro & Nano Powders

Optical Products

Crystal Substrates

Rare Earth Master Alloys

Precious Metal Catalyst
