### Section 1: Identification of the Substance/Mixture and of the Company/Undertaking

#### 1.1 Product identifier

**Product Name** 

Cobalt Based Alloys

**Synonyms** 

Alloy (X); CO (X); Cobalt (X); CoCrMo; ECY(X); F(X); FSX-414; GRADE(X); GX(X); Haynes (X); HS(X); L-605; MAR M (X); MERL (X); MM(X); Nicrallium (x); PT(X); PWA (X); RM-(x); Star (X); Stellite (X); Stoody (X); Triballoy® (x); WI (X); X-(X)

### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Relevant identified use(s)

 Cast ingots at varying weights and dimensions. Ingots are sold and distributed to downstream processors who remelt the superalloys into products used within various downstream applications.

#### **DANGER**

**Hazard statements** • H317 - May cause an allergic skin reaction

H334 - May cause allergy or asthma symptoms or breathing difficulties if inhaled

H351 - Suspected of causing cancer.

H361fd - Suspected of damaging fertility. Suspected of damaging the unborn child.

H372 - Causes damage to organs through prolonged or repeated exposure.

H373 - May cause damage to organs through prolonged or repeated exposure.

#### **Precautionary statements**

Prevention • P201 - Obtain special instructions before use.

P202 - Do not handle until all safety precautions have been read and understood.

P260 - Do not breathe dust or fume. P264 - Wash thoroughly after handling.

P270 - Do not eat, drink or smoke when using this product.

P272 - Contaminated work clothing should not be allowed out of the workplace.

P280 - Wear protective gloves/protective clothing/eye protection/face protection.

P284 - In case of inadequate ventilation wear respiratory protection.

P304+P340 - IF INHALED: Remove person to fresh air and keep comfortable for Response • breathing.

P342+P311 - If experiencing respiratory symptoms: Call a POISON CENTER/doctor.

P302+P352 - IF ON SKIN: Wash with plenty of water.

P321 - Specific treatment, see supplemental first aid information.

P362+P364 - Take off contaminated clothing and wash it before reuse. P333+P313 - If skin irritation or rash occurs: Get medical advice/attention. P308+P313 - IF exposed or concerned: Get medical advice/attention.

P314 - Get medical advice/attention if you feel unwell.

Storage/Disposal •

P405 - Store locked up.

P501 - Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

#### 2.3 Other Hazards

CLP

May form combustible dust concentrations in air.

Heating above the melting point releases metallic oxides which may cause metal fume fever by inhalation. The symptoms are shivering, fever, malaise and muscular pain. According to Regulation (EC) No. 1272/2008 (CLP) this material is considered

hazardous.

### Precautionary statements

#### Prevention • Obtain special instructions before use.

Do not handle until all safety precautions have been read and understood.

Do not breathe dust or fume. Wash thoroughly after handling.

Do not eat, drink or smoke when using this product.

Contaminated work clothing should not be allowed out of the workplace. Wear protective gloves/protective clothing/eye protection/face protection.

Use personal protective equipment as required.

In case of inadequate ventilation wear respiratory protection.

#### Response •

IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing.

If experiencing respiratory symptoms: Call a POISON CENTER or doctor/physician.

IF ON SKIN: Wash with plenty of soap and water.

Specific treatment, see supplemental first aid information.

Wash contaminated clothing before reuse.

If skin irritation or rash occurs: Get medical advice/attention.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses,

if present and easy to do. Continue rinsing.

If eye irritation persists: Get medical advice/attention. IF exposed or concerned: Get medical advice/attention.

Get medical advice/attention if you feel unwell.

#### Section 4 - First Aid Measures

### 4.1 Description of first aid measures

Inhalation

 Move victim to fresh air. Give artificial respiration if victim is not breathing. Administer oxygen if breathing is difficult. If signs/symptoms continue, get medical attention.

Skin

Wash skin with soap and water. If skin irritation occurs: Get medical advice/attention.

Eye

 In case of contact with substance, immediately flush eyes with running water for at least 20 minutes. If eye irritation persists: Get medical advice/attention.

Ingestion

• Rinse mouth. Do not give anything by mouth to an unconscious person. Get medical attention if symptoms occur.

### 4.2 Most important symptoms and effects, both acute and delayed

• Refer to Section 11 - Toxicological Information.

### 4.3 Indication of any immediate medical attention and special treatment needed

**Notes to Physician** 

All treatments should be based on observed signs and symptoms of distress in the
patient. Consideration should be given to the possibility that overexposure to materials
other than this product may have occurred.

### Section 5 - Firefighting Measures

### 5.1 Extinguishing media

Suitable Extinguishing Media • Use dry powder extinguishing agent.

Unsuitable Extinguishing Media

· No data available

### 5.2 Special hazards arising from the substance or mixture

Unusual Fire and Explosion Hazards

Metal powder dispersed in air may cause fire and explosion.
 Molten metal can ignite combustibles.
 Molten metal will react violently with water.

## Hazardous Combustion Products

No data available

### 5.3 Advice for firefighters

Wear positive pressure self-contained breathing apparatus (SCBA).
 Structural firefighters' protective clothing will only provide limited protection.

#### Section 6 - Accidental Release Measures

#### 6.1 Personal precautions, protective equipment and emergency procedures

#### **Personal Precautions**

Ventilate enclosed areas. Do not walk through spilled material. Wear appropriate
personal protective equipment, avoid direct contact. Do not touch damaged containers
or spilled material unless wearing appropriate protective clothing.

#### **Emergency Procedures**

• ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). As an immediate precautionary measure, isolate spill or leak area for at least 25 meters (75 feet) in all directions. If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2 mile) in all directions. Keep unauthorized personnel away.

### 6.2 Environmental precautions

· Avoid run off to waterways and sewers.

### 6.3 Methods and material for containment and cleaning up

## Containment/Clean-up Measures

Avoid generating dust.

Solid ingot material should be picked up and recycled. Where possible allow molten material to solidify naturally.

Residue from cutting or grinding should be swept or vacuumed and placed in suitable containers.

Use clean nonsparking tools to collect material.

Dust deposits should not be allowed to accumulate on surfaces, as these may form

an explosive mixture if they are released into the atmosphere in sufficient

concentration. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with

compressed air).

#### 6.4 Reference to other sections

 Refer to Section 8 - Exposure Controls/Personal Protection and Section 13 - Disposal Considerations.

### **Section 7 - Handling and Storage**

### 7.1 Precautions for safe handling

#### Handling

Under normal conditions, exposure to cast ingots presents few health hazards in itself. Ingots may be heavy. Use proper material handling equipment to reduce the risks of strains and sprains. Do not place any part of the body where it might be struck by or caught between the ingot and another object. Thermal cutting and melting of ingots may produce fumes and dust containing the component elements which may present potentially significant health hazards. Use only with adequate ventilation. Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres. To avoid possible explosion, ingots need to be clean and dry when loaded into molten metal or preferably loaded into an empty furnace. Nickel can react with carbon monoxide in reducing atmospheres to form nickel carbonyl, an extremely toxic gas. Cobalt causes a dermatitis of the allergic sensitivity type at points in friction. Cobalt toxicity also results in a progressive diffuse, interstitial pneumonia with a non-productive cough, dyspnea on exertion, interstitial fibrosis and cell damage. Other workers have experienced a sensitized respiratory disease characterized by cough, wheezing and shortness of breath where upon removal from the environment, the symptoms subside. Wear appropriate personal protective

equipment, avoid direct contact. Do not breathe dust or fumes. Avoid contact with skin, eyes, and clothing. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco.

### 7.2 Conditions for safe storage, including any incompatibilities

**Storage** 

 Store in a well-ventilated place. Keep container tightly closed. Keep away from incompatible materials.

### 7.3 Specific end use(s)

· Refer to Section 1.2 - Relevant identified uses.

### **Section 8 - Exposure Controls/Personal Protection**

### 8.1 Control parameters

### 8.2 Exposure controls

# **Engineering Measures/Controls**

Use a local exhaust when cutting, grinding, welding, or melting. It is recommended
that dust control equipment such as local exhaust ventilation and material transport
systems involved in handling of this product contain explosion relief vents or an
explosion supression system or an oxygen-deficient environment. Ensure that dust
handling systems (such as exhaust ducts, dust collectors, vessels and processing
equipment) are designed in a manner to prevent the escape of dust into the work area
(i.e., there is not leakage from the equipment). Use only appropriately classified
electrical equipment.

#### **Personal Protective Equipment**

#### Respiratory

For limited exposure, use P95 or N95 respirator. For prolonged exposure use an air-purifying respirator with high efficiency particulate air (HEPA) filters. Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or symptoms are experienced.

Eye/Face Skin/Body

- Wear safety goggles.
- Wear appropriate gloves. Wear long sleeves and/or protective coveralls.

# **Environmental Exposure Controls**

 Follow best practice for site management and disposal of waste. Controls should be engineered to prevent release to the environment, including procedures to prevent spills, atmospheric release and release to waterways.

#### Key to abbreviations

ACGIH = American Conference of Governmental Industrial Hygiene NIOSH = National Institute of Occupational Safety and Health

STEL = Short Term Exposure Limits are based on 15-minute exposures
TWA = Time-Weighted Averages are based on 8h/day, 40h/week exposures

OSHA = Occupational Safety and Health Administration

#### 9.2 Other Information

No additional physical and chemical parameters noted.

### Section 10: Stability and Reactivity

#### 10.1 Reactivity

No dangerous reaction known under conditions of normal use.

#### 10.2 Chemical stability

· Stable under normal temperatures and pressures.

#### 10.3 Possibility of hazardous reactions

· Hazardous polymerization will not occur.

#### 10.4 Conditions to avoid

· Avoid generating dust.

#### 10.5 Incompatible materials

 Cast Ingot is stable at ordinary temperature, however, caution should be taken with acids, bases, and oxidizers. Molten metal will react violently with water.

#### 10.6 Hazardous decomposition products

 Under normal conditions, exposure to cast ingots presents few health hazards in itself. Thermal cutting and melting of ingots may produce fumes containing the component elements and breathing those fumes may present potentially significant health hazards.

# Potential Health Effects Inhalation

Acute (Immediate)

 Processes such as cutting, grinding, crushing, or impact may result in generation of excessive amounts of airborne dusts in the workplace. Nuisance dust may affect the lungs but reactions are typically reversible.

Chronic (Delayed)

Repeated and prolonged exposure may cause sensitization of the respiratory system.
 Following sensitization of the respiratory system, cobalt exposure causes an
 obstructive lung disease with wheezing, cough, and shortness of breath. Chronic
 respiratory exposure results in reduced lung function, increased fibrotic changes on
 chest X-ray, production of scanty mucoid sputum, and shortness of breath. Chronic
 exposure to Nickel can cause effects such as rhinitis, sinusitis, nasal septal
 perforations and asthma have been reported in nickel refinery and nickel plating
 workers.

#### Skin

Acute (Immediate)

Exposure to dust may cause mechanical irritation. May cause skin sensitization.
 Symptoms include redness, and skin rash. Contact allergy to nickel is very common in human beings.

Chronic (Delayed)

No data available.

Eve

Acute (Immediate)

• Causes serious eye irritation. Excessive concentrations of nuisance dust in the workplace may reduce visibility and may cause unpleasant deposits in eyes.

**Chronic (Delayed)** 

· No data available.

Indestion

Acute (Immediate)

• Excessive concentrations of nuisance dust in the workplace may cause mechanical irritation to mucous membranes.

Chronic (Delayed)

**Carcinogenic Effects** 

- No data available.
- Repeated and prolonged exposure to fumes and dust created in processing this product may cause cancer.

#### **Reproductive Effects**

Repeated and prolonged exposure to fumes and dust created in processing this
product may cause reproductive effects.

#### 11.2 Other information

 Heating above the melting point releases metallic oxides which may cause metal fume fever by inhalation. The symptoms are shivering, fever, malaise and muscular pain.

• Product in ingot form is non-toxic to aquatic and terrestrial organisms.

### 12.2 Persistence and degradability

• The product is persistent and would have low degradability.

### 12.3 Bioaccumulative potential

· Material data lacking.

### 12.4 Mobility in Soil

• A low mobility would be expected in a landfill situation.

#### 12.5 Results of PBT and vPvB assessment

No PBT and vPvB assessment has been conducted.

#### 12.6 Other adverse effects

· No studies have been found.

### **Section 13 - Disposal Considerations**

#### 13.1 Waste treatment methods

**Product waste** 

Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

Packaging waste

• Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

### 15.2 Chemical Safety Assessment

· No Chemical Safety Assessment has been carried out.

#### 15.3 Other Information

 WARNING: This product contains a chemical known to the State of California to cause cancer.

#### Section 16 - Other Information

#### Relevant Phrases (code & full text)

• H228 - Flammable solid

H251 - Self-heating; may catch fire

H260 - In contact with water releases flammable gases which may ignite spontaneously

H302 - Harmful if swallowed

H361 - Suspected of damaging fertility or the unborn child.

H413 - May cause long lasting harmful effects to aquatic life
